CodeTwo Office 365 Migration

The shortest path from Exchange, SBS and Google Apps to Office 365 - **free** for Office 365 subscribers.

"In my usage, CodeTwo Office 365 Migration has been an easy way to get your on-premises Exchange mailboxes into Office 365's Exchange, whether you are doing a complete move of all users or moving some to Office 365 and keeping some local in a hybrid approach"

J. Peter Bruzzese,
(Exchange MVP)
InfoWorld

Mailbox migration

- **Direct 1-to-1 mailbox migrations to Office 365:** Migrate from any Exchange edition (even 2003), SBS or Google Apps to Office 365.

- **Public folders migration:** Seamlessly migrate public folders from Exchange to Office 365 using the program's convenient UI.

Fast and automatic

- **Reduces resource consumption:** The program requires only 1 administrator, eliminates the need for transitional environments and saves time by automating the process of mailbox migration.

- **Graphical interface:** Minimizes the need for PowerShell use. All features accessible directly via the Administration Panel.

- **Pre-configuration wizard:** Easy connection to the source server, as well as setup of target server permissions and EWS connection.

- **Automatic mailbox matching:** Automatic source and target mailbox matching simplifies pre-configuration in large organizations.

Secure and seamless

- **Zero impact migration & zero downtime:** The migration process is invisible to end-users. Availability of mailboxes and their contents remains unaffected.

- **100% security:** Mailbox data is encrypted using Exchange Server's SSL certificates and replicated directly between users' source and Office 365 organization, without modification, deletions or intermediaries.

- **Real-time reporting and logs:** Information about the progress and status of mailbox migrations is displayed directly in the Administration panel. Furthermore, real-time generated logs let you verify the migration on an item-by-item level.

Robust

- **Highly scalable:** Migrate any organization from 50 to 10,000+ mailboxes.

- **No size or speed limits:** The application does not affect the speed of a migration in any way, nor does it limit the size of migrated items.

Additional benefits

- **Delta migrations:** If new items are added to a source mailbox after the migration process is completed, the Rescan option allows you to perform an unlimited number of differential synchronizations, without creating duplicates.

- **Migration scheduler and mailbox priority:** Set time slots in which the migration will automatically start and finish. Decide which mailboxes will be migrated first by assigning priorities.

- **Pause and resume:** Pause an in-progress migration and resume it at a more convenient time, without risking failures or limiting end-user access to services.

- **Speed up hybrid deployments:** By automatically replicating mailbox contents from on-premises servers to the Cloud, the program lets you save time when creating Exchange Online/on-premises hybrid environments.

- **Free technical support:** Assistance via email, telephone and remote session for this product is provided free of charge.

- **Free for Office 365 subscribers:** Just add CodeTwo as your Partner of Record. Go to www.codetwo.com/office-365-migration/how-to-get-it-free to learn more

Supported migration scenarios

Target Server

Source Server	Office 365
Exchange 2003	All item types
SBS 2003	All item types
Exchange 2007	All item types
SBS 2008	All item types
Exchange 2010	All item types
SBS 2011	All item types
Exchange 2013	All item types
Google Apps	📅 ✉ 👤 📒

Legend:

All item types - Emails, contacts, calendars, tasks, notes, journals, public folders

📅 Calendars   ✉ Emails
👤 Contacts   📒 Archive

"Extremely helpful, if you are looking for a quick and painless way of moving your users to Office 365"
